

Forest Enhancement Society of BC

Gord Pratt — Operations Manager

BC Community Forestry Association Conference — May 25, 2018

FOREST ENHANCEMENT SOCIETY OF BRITISH COLUMBIA

Background

- On February 26, 2016, the B.C. Government announced the formation of the Forest Enhancement Society of BC (FESBC) with initial funding of **\$85M**.
- The Government envisioned the Society becoming an efficient organization which would deliver cost-effective and impactful programs to improve B.C. communities' resilience to wildfire while improving forest fibre utilization, forest carbon management, forest conditions and wildlife habitats.
- In February, 2017, the B.C. Government announced additional grant funding of **\$150M** to the Society to be focused on forest carbon.

FESBC Constitution

- The purposes of the Society as laid out in its Constitution are:
 - A. To advance environmental and resource stewardship of B.C.'s forests by:
 - i. Preventing and mitigating the impact of wildfires
 - ii. Improving damaged or low value forests
 - iii. Improving habitat for wildlife
 - iv. Supporting the use of fibre from damaged and low value forests, and
 - v. Treating forests to improve the management of greenhouse gases.
 - B. To advocate for the environmental and resource stewardship of B.C. forests.

FESBC Board of Directors & Staff

Wayne Clogg, Board Chair

Jim Snetsinger, Vice Chair, Governance and HR Committee Chair

Brian Banfill, Finance Committee Chair

Keith Atkinson, CEO, First Nations Forestry Council, Director at Large

Dave Peterson, ADM, Rural Development, Lands and Innovation Division

Rick Manwaring, Associate DM, Regional Operations (North, South, Coast), IROD and BCWS

Vacant- Director at Large

Executive Director » Steve Kozuki

Operations Managers » Dave Conly, Gord Pratt and Ray Raatz

Office Manager » Kathy Dupuis

FESBC Partners

Recognizing these are evolving and not limited to the following:

- **FLNRORD** – Providing guidance, identifying priorities, and authorizations and consideration of legislative and policy changes, including coordinating with FCI and FFT.
- **BC Parks** – Similar role as FLNRORD.
- **Forest Licensees** – adjusting harvesting plans and some of the heavy lifting.
 - Responsible for their legal obligations
- **Local Governments** – Seeking funding and gaining public support.
- **First Nations** – Seeking funding and provide input through consultation.
- **Union of BC Municipalities (UBCM)** – Co-funding agreement for the Strategic Wildfire Prevention Initiative (SWPI).
- **Habitat Conservation Trust Foundation (HCTF)** – Similar to UBCM, using their technical and project approval process. Co-funded \$1 million in 2018 and \$480,000 in 2017.

Application Guide

The Application Guide outlines:

- Applicant Eligibility & How to Apply
- FESBC Roles & Responsibilities
- Project Selection Criteria
- Application Review and Assessment Process
- Project Delivery, Changes & Final Reporting
- Project Finances & Eligible Costs
- **Will be updated for next intake.**

Eligible Applicants

Currently:

- **Area based tenures holders - Community Forests, First Nation Woodland Licences, Woodlots, and Tree Farm Licences.**
- **Forest Licensees/forest tenure holders operating within a Timber Supply Area**
- **First Nations Governments (also in collaboration with SWPI, where applicable)**
- **Conservation organizations**
- **Local Governments - Municipalities and Regional Districts (in collaboration with SWPI)**
- **Provincial Government resource management agencies; primarily the Ministry of Forests, Lands, Natural Resource Operations & Rural Development**
- **Consultants performing or providing forestry services on behalf of government and/or industry**

Getting Started with Projects

TO BE CLEAR:

- FESBC is not the land manager. Planning and authorizations is government's responsibility. CFA holders manage their licence area.
- FESBC works closely with Provincial agencies who identify the highest priority areas for treatment.
- Highest priority projects will be those which meet multiple Society objectives..
- FLNRORD undertaking Integrated Investment Planning – critical to wise investment decisions.

Funding Considerations

- Crown Agency working under the direction in our mandate letter from the Minister and our Service Plan.
- Board Direction
 - Projects on Provincial Crown land only.
 - May set target spend levels by purpose.
- Land manager priorities, Integrated Investment Planning.
- Granting agency with finite funding, focus on treatments.
- Originally no hard timelines were set for spending.
- Forest Carbon Projects complete in next 4 years.
- Approving multi-year projects.

CFA Funding Expectations/Challenges

- FESBC recognizes limitations around available AAC.
- Wildland Urban Interface and Strategic Wildfire Prevention Initiative (SWPI). Requirement to contribute profits to projects.
- Legal obligations and identifying eligible incremental costs.
- Social licence expectations and area base licence management.
 - Includes managing fire mitigation & safety of communities.
- Proponent/Licensee contributions.

Summary of Funds Allocated to Date by FESBC

PURPOSE REGIONS	Wildfire Reduction /Mitigation	Improving Damaged or Low-Value Forests	Wildlife Habitat Improvement	Fibre Recovery	Forest Carbon Management	Total
Cariboo	\$25,788,552	\$20,596,353	\$216,000	\$1,937,319	\$65,000,000	\$113,538,224
Thompson Okanagan	\$3,659,550	\$1,900,012	\$222,222	\$416,400	\$1,394,654	\$7,592,838
Kootenay Boundary	\$4,666,611	\$23,000	0	\$138,845	0	\$4,828,456
Skeena	\$1,034,962	\$579,800	0	0	\$463,566	\$2,078,328
Omineca	\$692,454	\$110,584	0	\$726,000	\$332,602	\$1,861,640
Northeast	0	\$500,000	\$529,300	0	0	\$1,029,300
South Coast	\$1,554,028	\$114,000	0	\$7,800	\$7,001,020	\$8,676,848
West Coast	0	\$384,050	0	0	\$300,894	\$684,944
Province Wide	\$144,350	\$154,600	0	0	\$22,565,270	\$22,864,220
TOTALS	\$37,540,507	\$24,362,399	\$967,522	\$3,226,364	\$97,058,006	\$163,154,798

Funding Allocations for Community Forests

FESBC Intake	Number of Projects	Total Allocated Funds
Pre-November 2017	15	\$3.4 million
November 2017	15	\$4.8 million

21 CFA's with Approved Projects

CFA	Region	FESBC Purpose
Burns Lake	Skeena	Wildfire Risk Reduction
Wetzin'kwa	Skeena	Wildfire Risk Reduction
Terrace	Skeena	Stand Rehab
Babine Lake	Skeena	Wildfire Risk Reduction
Little Praire	Northeast	Stand Rehab/Fibre Recovery
Esk'etemc First Nation	Cariboo	Wildfire Risk Reduction
100 Mile House	Cariboo	Wildfire Risk Reduction
Clinton	Cariboo	Wildfire Risk Reduction
Williams Lake	Cariboo	Wildfire Risk Reduction/Stand Rehab/Fibre Utilization
Eniyud	Cariboo	Wildfire Risk Reduction

21 CFA's with Approved Projects

CFA	Region	FESBC Purpose
Slocan	Kootenay Boundary	Wildfire Risk Reduction
West Boundary	Kootenay Boundary	Stand Rehab (Fire)
Harrop-Proctor	Kootenay Boundary	Wildfire Risk Reduction/Stand Rehab
West Boundary	Kootenay Boundary	Stand Rehab (Fire)
Kaslo and District	Kootenay Boundary	Wildfire Risk Reduction
Westbank First Nation	Thompson Okanagan	Wildfire Risk Reduction/Stand Rehab
Xaxli'p First Nation	Thompson Okanagan	Wildfire Risk Reduction
Logan Lake	Thompson Okanagan	Stand Rehab and Wildfire Risk Reduction
Lower North Thompson	Thompson Okanagan	Carbon
Cheakamus	West Coast	Wildfire Risk Reduction
Cowichan Lake	South Coast	Carbon

Some FESBC Projects will result in ...

Fuel management treatment to reduce wildfire risk, rehabilitate low value forests, restore cultural attributes and enhance wildlife habitat

Before

3 Years After

Williams Lake Community Forest— FESBC Funded Project

Landscape Level fuel reduction
treatment with fibre utilization.
